## All mapped out

M2

### You will need

Your Page and a pen or pencil

### What to do

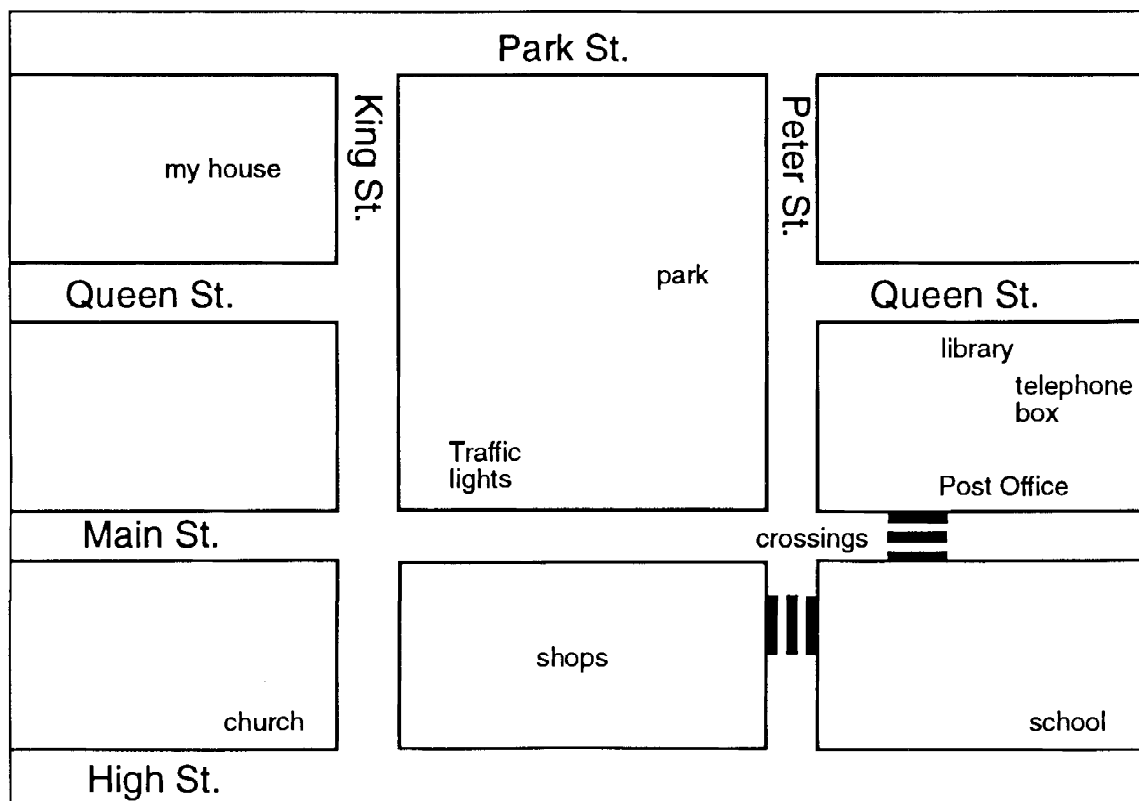

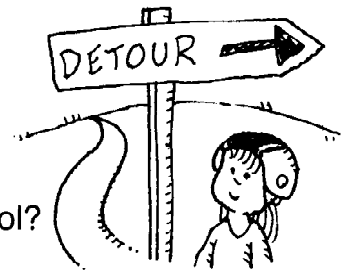

What is the quickest way to get from my house to school?

Is it also the safest way?

If I had to buy something at the shop on the way home, which would be the best way.

If I went by bike, which would be the safest way to go? Why?

(Bikes are not permitted in the park).

### WHERE'S THE MATHS?

Mapping skills are important.

### HINTS FOR PARENTS

Point out that there is more than one way to go - it depends on different criteria ; for instance, the quickest way is not always the safest.
